

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

The Legislature of 1885 have passed an act (chap. 178) which limits debt and taxation in the City of Boston, as will be seen by the following sections:—

SECTION 1. The taxes assessed on property in the City of Boston, exclusive of the State tax and of the sums required by law to be raised on account of the city debt, shall not exceed in any year nine dollars on every one thousand dollars of the average of the Assessors' valuations of the taxable property therein for the preceding five years, the valuation for each year being first reduced by the amount of all abatements allowed thereon previous to the thirty-first day of December in the year preceding said assessment. Any order or appropriation requiring a larger assessment than herein first above limited shall be void.

SECT. 2. The limit of indebtedness of the City of Boston shall hereafter be two and one-half per cent. up to and until the first day of January in the year eighteen hundred and eighty-seven, and thereafter shall be two per cent. on the average valuation prescribed in section one of this act, instead of three per cent. on the last preceding valuation, as provided in section four of chapter twenty-nine of the Public Statutes.

The following table shows the valuation of the city, gross funded debt, annual appropriations, and tax-rate since 1875; the highest valuation and annual appropriation, previous to 1884, were reached in 1874, the valuation being \$798,755,050, and the appropriations \$12,146,643:—

Total amount remaining in the treasury to reduce taxation for the financial year 1885-86,	<u>\$991,111 21</u>

The above amount of \$991,111.21, resulting from the actual business of the year, remained in the treasury in conformity with the requirements of Chap. 15, Sect. 10, of the Revised Ordinances; and an order of the City Council of April 30, 1885, provided that it be used towards meeting the appropriations for the financial year 1885-86.

The annual appropriation order of the City Council provides that no money shall be drawn for by the Mayor and Auditor, or be paid by the Treasurer, unless the same has been previously appropriated by a special vote of the City Council; hence the necessity of applying to the City Council for additional means, if from any cause an *original appropriation* falls short. The additional means thus asked for can only be furnished by an *authorized* transfer from some existing appropriation which can spare it, or by a *specific* loan. In this manner the City Council retain a *knowledge and control* of all the expenditures, as none can be made unless an appropriation for the same is expressly authorized by them.

Farm-Pond Conduit. — At the date of the last annual report, Messrs. Parker & Sylvester were filling into the pond from the trestle on the line of the conduit. They completed the filling on August 29, having deposited 59,010 cubic yards of material, at a cost of \$27,672.70. On August 20 a contract was made with G. M. Cushing, of New York, for building a conduit 3,760 feet in length between the upper and lower gate-houses.

This contract will be completed during the coming season.

Basin No. 4. — The work upon this reservoir has so far advanced that the reservoir has been partially filled.

The work remaining to complete the reservoir consists of between 10,000 and 12,000 cubic yards of material in the embankment of the dam, the superstructure of the gate-chamber, the wash-wall on the inner slope of the dam, soiling, etc.

The work will be finished during the present year.

Public Park, Back Bay. — The filling done during the year was for grading around the Boylston-street arch, and for forming the shores of the water-way.

The excavation of the water-way has been continued, and about 16,000 lineal feet are now completed. The area of the channel now excavated is about 20 acres.

The pointing of the Boylston-street arch and the construction of the wing-walls have been completed.

All the loam needed for the park has been delivered; a sufficient quantity of meadow-muck has been delivered, and composted with stable manure.

About 8 acres have been graded and loamed, most of which is planted. About 6 acres of marsh have been excavated and re-sodded, at the established grade.

Covered Channel, Muddy River. — The gate-chamber has been

completed, and is ready for use as soon as the conduit, which was damaged in the fall, is repaired.

Bussey Park. — The road from South street to Centre street, began in 1833, has been completed, and a large amount of stone quarried for use on roads hereafter to be built.

West Roxbury Park. — Three shelter buildings have been built, also a propagating house. The ground has been cleared and put in order for a nursery. Considerable work has been done in the way of clearing the grounds of the park, of fruit and other trees, which it is not desired to preserve.

Marine Park, City Point. — The grounds have been cleared of rubbish, the old cellars filled, a fence built, and a building fitted up for a waiting-room and shelter.

Wood Island Park. — The drive-way from Bennington street to the Revere Beach R.R. has been graded.

Charles River Embankment. — A contract has been made for and work begun on the construction of the sea-wall and the filling of area behind it.

IMPROVED SEWERAGE. — The work of construction has been continued during the past year. The west-side intercepting sewer has been completed, and many connections have been made with the common sewers, so that at the present time the whole of the city proper is connected, with the exception of a small area at the North End, which it was not originally proposed to connect. At the pumping-station the permanent engine-house has been practically completed, and the temporary wooden structure has been removed. The pumps have been operated day and night without interruption, and the whole system has been working in a very satisfactory manner. The sewage of the city, instead of being discharged into the docks and bays in close proximity to the residential and business portion of the city, is now regularly discharged at Moon Island, five miles down the harbor, at a stage of the tide when tidal currents carry it five miles farther.

The effect of this change is noticeable in the much greater purity of the water around the city and in the absence of offensive odors formerly prevalent in parts of the city in the summer season. Cellars which were once flooded during heavy storms have been dry since the new system has been put in operation.

A considerable amount of work remains to be done to put these works in thoroughly efficient condition, and for this purpose an additional appropriation has been granted.

IN THE BOARD OF COMMISSIONERS ON THE SINKING-FUNDS,

BOSTON, June 15, 1885.

The Committee on Accounts of this Board, to whom was referred the Annual Statement of its Treasurer, having completed their examination of the assets of the Sinking-Funds, and caused the accounts of the Treasurer to be examined by an expert accountant, whose report is herewith annexed, report as follows:—

We find the trial balance of the Treasurer, Alfred T. Turner, on the 30th of April, 1885, called for assets amounting to . . . \$17,940,484 25

These assets consist of:—

Cash deposited in various banks, as enumerated by the	
Treasurer in his statement, amounting to . . .	\$3,059,484 25
Investments in City of Boston bonds . . .	14,881,000 00
	<u>\$17,940,484 25</u>

Respectfully submitted,

HENRY F. COE,
EDWARD P. FISK, } *Committee.*

To the Board of Commissioners on the Sinking-Funds:—

At the request of your Committee on Accounts, I have examined in detail the accounts of your Treasurer for the twelve months ending April 30, 1885, and would respectfully

REPORT:

That I verified, on the 2d day of June, 1885, all the bank deposits to the credit of the Sinking-Fund account, and then proved all the entries back to April 30, 1885, confirming thus the cash balance at close of business at the latter date. I have verified all the interest earned at the several banks of deposit during the twelve months, and also the interest maturing on all the investments during the same current year. Have also proved all other cash entries on both sides the account by corresponding transactions in the City Treasurer's general account, and by the records of the Auditor's office.

I find all the accounts accurately and faithfully kept, and the books conform to the trial balance submitted by the Treasurer under date of April 30, 1885, a summary of which I append hereto, and mark "A."

In schedule marked "B" is shown the proof of Income of Investments; and in schedule "C" a summary of the year's transactions.

I did not examine the bonds comprising the Investments of the Sinking-Funds, as the chairman stated that the committee had fully verified these at the close of the year, and further verification was unnecessary.

Respectfully submitted,

R. STUART CHASE,
Auditor of Accounts.

LAMP DEPARTMENT.

The whole cost of lighting the streets of the city during the financial year 1884-85 was \$481,001.98, against \$496,915.91 in the previous year. On the 15th of December the city was lighted with 9,807 gas, and 2,591 oil lamps, being an increase of 184 gas, and a decrease of 25 oil lamps, as compared with the previous year.

The lamps are located as follows: —

In City Proper	3,564 gas, and 124 oil.
In South Boston	764 gas, and 485 oil.
In East Boston	776 gas, and 163 oil.
In Roxbury District	1,764 gas:
In Dorchester District	1,106 gas, and 679 oil.
In West Roxbury District	541 gas, and 855 oil.
In Brighton District	444 gas, and 285 oil.
In Charlestown District	808 gas.
In Brookline	37 gas.
In Chelsea (Meridian-st. bridge)	3 gas.

The prices paid for gas in the public lamps to the several gas companies are: Boston, at the rate of \$1.30 per thousand cubic feet; Roxbury, \$1.65; Charlestown, \$1.75; South Boston, East Boston, \$1.85; Dorchester, West Roxbury, Brighton, and Chelsea, \$2.00 per thousand feet.

The men who clean and light the gas lamps are paid at the rate of 1½ cents per lamp per night, and have an average of 96 lamps each, except those in Roxbury, Dorchester, West Roxbury, and Brighton districts, who receive one dollar and seventy cents per day.

The underground *service*-pipes are laid and kept in repair by the various companies, under the direction of the Superintendent of Lamps, and at the expense of the city, without pecuniary consideration or profit to the companies.

The oil lamps, during the past year, have been lighted and cleaned by men employed by the Superintendent of Lamps, at the rate of 3½ cents per lamp, per night, for this service.

The oil is purchased of the refiners at the lowest market rates.

In addition to the above there are 401 electric lights burning, under contract with Electric Lighting Companies of this city, at the rate of 65 cents per light per night. The city provides the iron posts, and the companies furnish the lamps and light.

¹ Included in the total valuation of 1865, and all subsequent years, was an assessment upon corporations chartered by the Commonwealth of Massachusetts, for real estate and machinery. The last item is taxed as personal, and is the only personal estate taxable by local assessors to a Massachusetts corporation.

	Real Estate.	Machinery.	Total.
In 1881, 176 corporations were assessed, as follows:	\$43,301,200	\$3,514,100	\$46,815,300

" 1884, 215 " " "	47,866,200	4,795,900	52,662,100

² The City of Roxbury, with a valuation of \$18,265,400 real, and \$8,286,300 personal, total \$26,551,700, united with Boston in 1867, its valuation as a part of Boston taking effect in 1868. The aggregate valuation of Boston and Roxbury in 1867 was \$471,497,800.

³ The town of Dorchester, with a valuation of \$12,826,200 real, and \$7,489,500 personal, total \$20,315,700, was annexed this year. Its valuation forms a part of the total valuation of Boston for 1870. The united valuation of the two municipalities for 1869 was \$569,827,300.

⁴ The City of Charlestown and towns of West Roxbury and Brighton were annexed to Boston in 1873, their valuation taking effect as a part of the city in 1874.

Valuation of Charlestown in 1873 was \$26,016,100 real, \$9,273,582 personal, total, \$35,289,682

" West Roxbury " 16,254,350 " 5,894,250 " " 22,148,600

" Brighton " 11,964,450 " 2,584,081 " " 14,548,531

The valuation in 1873 of Boston and the municipalities that were annexed to the city in that year was \$765,818,213.

⁵ In consequence of the act of 1881, exempting money loaned on mortgage of real estate, the personal estate valuation receded, notwithstanding large gains were made upon the other items of personal estate.

The valuation of 1884 for personal property can be fairly increased \$37,013,000, in addition to the amount given in the foregoing table for the value assessed by the Commonwealth at the rate of \$15 ³/₁₀₀ per \$1,000, upon shares of Massachusetts corporations, the property of residents in Boston. The State deducts from the value of each share the amount that represents the real estate and machinery locally assessed, and pays over to the city that proportion of the tax that represents the personal property of each corporation.

The valuation can be further increased, say \$1,551,000 for bank stock, assessed at the several rates of the places where the banks are located, as the taxes are paid to Boston as assessments upon this class of property held by its citizens in Massachusetts banks located outside that city.

As the revenue from these two sources is always estimated before the amount to be raised by taxation is determined, the effect of the valuation of this property in reducing the rate of taxation upon the \$682,656,658 assessed by the city is, as nearly as may be, the same as though its amount was included in the Assessors' aggregate, and the taxes were assessed by them.

The total valuation of personal estate which is assessed for all purposes for which the city must raise money by taxation can, for the year 1884, be put at \$238,090,058.

In addition to the taxable valuation, churches, charitable, scientific, and literary corporations hold property exempt by law from assessments, as follows: Value of land, \$11,631,200; value of buildings, \$11,897,100. Total real estate, \$23,528,300; personal estate, \$3,448,500. The City of Boston holds in its corporate capacity (not assessed for city taxes) \$18,504,875 of actual assets available for the payment of liabilities, and \$40,426,708 nominal assets, the character of which is shown in the following copy of the return of the Assessors as of May 1, 1884, to the State Treasurer: —

¹ Chapter 299 of the Acts of the year 1879 requires that the State Tax and County Tax shall be assessed on polls, *provided* that each of such taxes shall not exceed the sum of one dollar (two dollars for the entire tax upon each poll). The excess above the amount so raised must be assessed on property. In the above table the sums stated in the columns of STATE TAX and COUNTY TAX, respectively, are the whole amounts required to be raised, and the figures in the columns of RATE show the amount per \$1,000 for which *property* was assessed to make up the deficiency after the polls had been assessed at one dollar each for State and County purposes.

The principal cities of the United States have each their own system of

SPECIAL ASSESSMENTS.

That of Boston, previous to the enactment of Chapter 174 of the Acts of the year 1866 (generally known as the betterment law), consisted of assessments upon abutters, for the cost of sidewalks for foot-passengers upon the public streets, where the owners of estates have failed to construct them; and for three-quarters the expense of construction of new sewers, the city assuming one-quarter the cost. The Act of 1866 enables the city to assess upon the owner *one-half the amount* that his estate has been *benefited* by the laying out, widening, or change of grade of any street, after the city shall have first paid all the land and building damages and the full cost of the work. The following table exhibits the character and amount of these special assessments from the year 1865:—

A table compiled from official reports shows the valuation, amount, and rate of taxation of the city of New York for twenty years:—

¹ Previous to 1872 the whole cost of sidewalks was assessed upon abutting estates, but Chapter 303 of the Acts of that year limits the assessment to one-half of the cost of construction.

² Full cost assessed to 1872. Half cost subsequent to that date.

³ The entire betterment assessment of 1879 was laid by the Park Commissioners, under authority of Chapter 185 of the Acts of 1875, and was for the benefit to property in the vicinity of the new Public Park (106 acres) in the "Back Bay District."

The figures given above do not include the "special assessments;" they are not given, as there are no data as yet collected by which their detail and amount can be known. That such assessments are laid upon estates for purposes which in Boston are included in the expenditures met by the general tax levy is well known. That they are considerable in amount there can be no doubt. That they are sometimes very heavy is evident by the following statement: The valuation, between 1868 and 1878, inclusive, of a lot of vacant land, bounded northerly by 97th street, easterly by Old Broadway, southerly by 96th street, and westerly by "the Boulevard," containing eight house-lots, with a total area of 20,200 square feet, ranged

¹ In January, 1874, the towns of Kingsbridge, Morrisania, and West Farms were annexed to the City of New York. Their real estate valuation of about \$9,500,000, was increased by the authorities of New York City to about \$23,000,000, in order that their assessments might be based upon the same scale of appraisement as the property of Manhattan Island. This increased valuation was included in the tax of 1874.

from \$4,750 to \$37,700, with an average of \$24,664, the annual taxes averaged \$652.81, or \$26.70 per \$1,000; and the special assessments for sidewalks, paving, grading, etc., and also for betterment by the location of certain public parks [some of which were four miles distant from the land assessed]¹ averaged \$1,282, or \$52 for \$1,000, a total average rate per annum of \$78.70.

For the years 1872 to 1876, inclusive, a special assessment was laid on each one thousand dollars as a "*Public Building Tax*." The rate of this special tax for the years 1872 to 1876, inclusive, is included in the table above given, and is stated in detail in the foot-note upon the next page.

In the assessment of 1868, real estate, which had previously been assessed at a nominal valuation, was placed at the full market value, and assessments have since been made upon that basis. Several classes of personal property, which, under the law of Massachusetts, are included in the valuation of the cities and towns of the Commonwealth, are, under the laws of Pennsylvania, assessed exclusively for the benefit of the State. A "precept" issued to the assessors of Philadelphia by the Board of Revision of Taxes, subsequently to 1880, requires the assessment of "All mortgages, all money at interest, or owing by solvent debtors, upon promissory note, bond, judgment, or otherwise, not including bank notes. All money loaned or invested on interest in any *other State*, or in stocks or bonds of corporations of any *other State*; all furniture, including gold and silver plate above the value of \$300; all pleasure carriages; all vehicles used for transporting passengers for hire, stating the kinds of vehicle; all annuities over \$200, except those granted by this Commonwealth or the Federal government; all gold and silver watches; all horses, mares, geldings, mules, and neat cattle, over the age of four years." The personal property assessed on account of the municipality consists of furniture, horses, cattle, and pleasure-carriages. An enactment of the Legislature of 1868, first taking effect in the levy of 1869, requires a discrimination in the assessment taxes upon real estate. The suburban portion of this municipality is assessed upon two-thirds, and the farming land upon one-half, of the rate

It is claimed that from 1866 to 1875, inclusive, the appraisement of real estate has been for the market value. The personal estate liable to taxation under the laws of the State of Illinois is substantially the same as that assessed in Massachusetts.

The City of Chicago is made up of three districts or townships, viz., South, North, and West Chicago, which, in addition to their proportion of the city taxes, as shown in the above table, are assessed for their proportion of State and county taxes, and for certain local improvements, the city in its corporate capacity not being assessable for these purposes. Railroad property in Chicago is assessed in these several districts. The valuations upon which these assessments are made are reduced by boards of equalization to correspond to assessment values in other parts of the State and county. The tables, which may be found in preceding reports, exhibit the operation of this system.

In addition to the State, county, city, and town taxes, Chicago has a system of special assessments, paid wholly by the real estate benefited by the special improvements, which, for the year ending January 1, 1883, were:—

For wooden pavements,	\$1,009,566 22
“ lamp-posts,	82,296 29
“ miscellaneous improvements,	723,511 02
“ private drains,	105,974 00
“ water-service pipes,	102,269 55
“ sidewalks,	162,098 00
“ street and alley openings and widenings,	79,041 96
	\$2,214,757 04

¹ Includes railroads. (The amount for 1883, \$3,190,854.)

² The city tax for this year was not extended on this assessment, in consequence of the court refusing judgment on delinquent real estate for 1874. The city taxes were therefore extended on the State and county assessment, and collected under the provision of the General Revenue of the State, it being optional with the City Council to either collect under the City Charter or under the General Revenue law. The valuation of 1875 on the State and county basis was, —

Real estate,	\$125,468,605 00
Personal estate,	48,295,641 00
Total valuation,	\$173,764,246 00

The rate of taxation for city purposes on this valuation was \$29.40 per thousand.

BALTIMORE.⁴

Population of Baltimore by United State census in 1860, 184,520; United States census in 1870, 267,354. Municipal census in 1870, 288,070.⁵ United States census of 1880, 332,190.

Assessments are made at the full cash value of property, real and personal, and for real estate are designed to cover a period of ten years.

The City and County of Baltimore have distinct municipal governments; and county taxes must be in addition to those imposed by city authority. By a law passed in 1878 corporations which had previously been exempt upon their property, because the shareholders were assessed the full value of the shares, were, in 1879, assessed for their real property where located, and the shares were taxed after allowance for real-estate assessments had been made. The effect is shown by an increased real and a diminished personal estate valuation.

¹ After the great fire in October, 1871, a change in the law for making special assessments greatly reduced their amount. The items omitted were street and alley openings and widenings. In the assessment of 1875 these items again appeared in the list of special taxes, but omitted in 1876; they reappeared in 1877. Since 1875 no levy has been made for gas-service pipes, which formed for many years before that date one of the items of special assessment.

² No special assessments levied this year.

³ The fiscal year which, in 1875, and previous to that date, ended on the first day of April, was in 1876 closed on the first day of January. The special assessments of that year cover a space of nine months only.

¹The assessment of 1877 was made under the new act of 1876. The fiscal year 1877 terminated Oct. 31st, and that of 1878 commenced Jan. 1st of that year. The appropriations of Nov. and Dec., 1877, were provided for in the tax levy of 1878.

²New valuation for the decade 1881 to 1891.

¹ Under the laws of Ohio, real estate is valued, for the purpose of taxation, once in ten years, the new valuations taking effect in 1860 and 1871. The gain of \$17,000,000 upon this class of property, during the ten years preceding the assessment of 1870 and the gain of \$6,000,000 for the same time preceding 1880, represent the improvement in old, and the value of new buildings. The real-estate valuation of the city, as made by the assessors of 1870, was, in round numbers, \$145,000,000.

This estimate was deemed excessive, and an act of the Legislature was obtained authorizing local boards to reduce it nineteen (19) per cent. The reduced valuation of the real estate of the city upon which the tax of 1871 was levied was placed at \$123,427,888, and is the *official*, if not the *true*, valuation of the property. The figures of subsequent years indicate reduced values.

The table which follows shows the amount of taxes levied in this city since 1865, and the rate of tax per thousand for State, county and city purposes. The column marked "Delinquencies and Forfeitures" is thus explained. Unpaid taxes of former years are added to and form a part of the grand total of each year, until they are paid, or the several accounts are closed by a sale or otherwise.

In addition to the supply in the lake, "Dug Pond," containing 4½ acres, and "Dudley Pond," containing 81 acres, are connected with and form important tributaries to it. The whole circuit of the lake, measuring at its verge when within two feet of high-water mark, is about 16 miles, and the city owns an average width of five rods around it, which is held free from taxation; also 1½ acres at the outlet of Dudley Pond. In addition to this the city owns 23½ acres in Wayland, 72½ acres in Natick, and on the line of the aqueduct, — not including land appurtenant to the Chestnut-Hill and Brookline Reservoirs, nor land occupied by and necessary for the protection of the aqueduct, — 27½ acres in Needham, 5½ acres in Newton, 1½ acres in Brookline, which is taxable.

A section of conduit, 4,170 feet in length, connects Farm Pond with Dam No. 1 on the Sudbury river. The city owns a width on the line of the conduit varying from 80 to 400 feet. In effecting settlements for the land taken for the conduit and storage-basins, the Boston Water Board have, in many cases, purchased land not actually required for the above purposes.

The whole line of the Water-Works, extending from Lake Cochituate, and continuing through a brick aqueduct, iron pipes, and stone tunnel, 14½ miles, to a reservoir in Brookline, of about 28 acres of water surface, and 119,588,960 gallons' capacity.

The "Chestnut-hill Reservoir," situated in the Brighton District, of the capacity of 780,000,000 gallons, with a water-surface of 123½ acres. There are 212½ acres in this whole property, the line of pipe from Chestnut-Hill Reservoir to the main near the Brookline Reservoir; also, the land under which are the pipes, being in amount about 6½ acres.

The "South Boston Reservoir," on the east side of Telegraph Hill, South Boston, covers with its embankments an area of about 126,000 square feet. It resembles in shape a segment of an ellipse, and has a water area, when at high-water mark, of 70,041 square feet, and a capacity of 7,508,246 gallons. This reservoir is now used for storage, and is connected with the distributing-pipes only in case of fire or accident to the pumping-mains.

The "East Boston Reservoir," on Eagle Hill, East Boston, is bounded westerly by Brooks and southerly by White street. The land covered by and appurtenant to it comprises about 216,027 square feet. Its water area, when at high-water mark, is 44,100 square feet, and its capacity 5,591,816 gallons.

It was built specially for the high-service supply, and will hold 7,200,000 gallons above a plane 2½ feet above the bottom of the outflow pipe. The area of the water-surface, when at high-water mark, is 64,033 square feet, and its elevation 219 feet above tide-marsh level. A strip of land 25 feet wide leading from Fisher avenue, and containing 2,887 square feet, was purchased for a route for the pipes to the reservoir.

The main pipes leading from the receiving reservoirs in Brookline, Brighton District, and Newton, to this city, and the distributing pipes laid in the city proper, East Boston and South Boston, Roxbury, Dorchester, West Roxbury, and Brighton Districts, aggregate in length 367 miles, varying in size from 3 to 48 inches in diameter.

Building on Elmwood street and place, on a lot of 5,563 square feet, in which are the pumping-engines for supplying water to the highest parts of the city, by means of the stand-pipe erected on Highland Park, formerly known as the "Fort Lot," between Beech Glen and Fort avenue. This lot was placed in charge of the Cochituate Water Board by an order of the City Council of 1870. It contains 114,360 square feet.

The report of the Boston Water Board to the City Council, for the financial year 1884-85, contains an account of the water-pipes and other stock on hand, and a full statement of the condition of the works.

The cost of construction of these works to the city, up to the 30th April, 1885, is \$18,178,644.45.

MYSTIC WATER-WORKS.

The upper portion of Mystic lake, which is the source of supply, is situated in the towns of Medford, Arlington, and Winchester, 6½ miles from Charlestown square. It has an area of about 200 acres when flowed to the level

authorized by the act to take water, and a storage capacity of that level of 380,000,000 gallons. The area of country forming the drainage-basin is 27.75 square miles. To convey the water of the lake to the citizens the works consist of dam and overfall; conduit with its appurtenant gate-houses, waste-weir, and ventilator; cast-iron main under Mystic river; engine-house; pumping-engines; force-mains; reservoir with influent and effluent chambers; supply mains and city distribution-pipes, hydrants, gates, etc.

The dam is 1,560 feet long, built of earthwork and masonry, and its height is 11 feet above high-water mark of Boston Harbor. The conduit is 7,450 feet in length, constructed of hydraulic brick masonry 8 inches thick. It is oviform in shape, 5 feet 8 inches high, and 5 feet wide, interior dimensions. The cast-iron mains, two in number, conveying the water from the pipe-chamber at the end of the conduit to the engine-house, are 487 feet long and 8 feet in diameter.

The engine-house is situated on the southerly bank of and about 200 feet from the Mystic river.

It is a substantial building, 120 feet long and 58 feet wide, constructed of faced brick and freestone, and embraces under one roof the boiler and engine rooms, repair-shop and pump-well. The lot of land about the engine-house is about 12 acres, and upon a portion of it is a dwelling-house for the engineers, and also a stable. Connected with the engine-house is a brick and stone coal-shed, having a capacity of 1,000 tons.

In the engine-house are three of Worthington's Duplex Pumping-engines, two of 5,000,000 gallons each and one of 8,000,000 gallons' capacity, per 24 hours. Eight boilers supply the steam for pumping the water.

The force mains are of cast-iron, each 30 inches in diameter and 3,277 feet in length. The reservoir is on Walnut Hill, in Medford, near Tufts College. Its water service covers an area of $4\frac{1}{2}$ acres, being nearly a parallelogram in shape 560 feet by 350 feet.

High-water line is 147 feet above tide-marsh level, and at this grade its capacity is 26,244,415 gallons.

The whole lot of land connected with the reservoir belonging to the city is about $10\frac{1}{2}$ acres.

The whole length of distribution-pipes in Charlestown is about 30 miles. The whole length of distribution-pipes supplied by the Mystic works is about 146 miles. The city owns also a lot of land containing 12,807 square feet, on Medford street, with a substantial brick stable upon it. This land is used for a pipe-yard.

A two-story brick building, 38 X 40, built during the year 1882-83, for use as a workshop, is located on land of the city at the corner of Medford and Tufts streets.

MYSTIC SEWER.—The Mystic sewer extends from Prospect street in Woburn to Lower Mystic pond in West Medford, a distance of 18,892 feet. The sewer was built to intercept the objectionable drainage from the tanneries, and discharge it into the lower pond at the head of the tide-water. The area of land taken under the act of the Legislature for the construction of the sewer and branch drains was 97,245 square feet.

The cost of construction of the Mystic Water-Works up to the 30th April, 1885, is \$1,656,266.50.

After the receipt of said sum, the city is required to spend not less than one thousand dollars in every five years, during the twenty-five years next succeeding (i.e., the income of four thousand dollars, at the rate of five per cent. per annum), in the purchase of books in the Spanish and Portuguese languages and literature. At the end of twenty-five years the income of the said sum is to be expended annually in the purchase of books of permanent value, either in the Spanish or Portuguese languages, or in such other languages as may be deemed expedient by those having charge of the library.
